Contact the Davis Public or Marlow Town Library for more information

Justin Garner has been hooked on plants since the fourth grade. His formal education in organic and biochemistry, physiology, and pathophysiology, botany and clinical herbalism in conjunction with his direct experiences with the plants themselves allows him to gain a holistic perspective of his clients. He uses this perspective to educate his clients on herbal, dietary, and lifestyle changes that can aid them on their paths to health. He practices out of Sweet Flag Medicinals in Brattleboro, Vermont. Justin is also an avid edible and medicinal mushroom forager. He enjoys teaching both children and adults about the wonders of the woods and fields around us. He has been introducing students to wildcrafting mushrooms and wild edible plants at The Compass School in Westminster, VT and leading mushroom forays at Distant Hill Gardens in Walpole, NH and for the Bonnyvale Environmental Education Center in West Brattleboro, VT.
